

Summer brings hot humid weather, sunny skies, afternoon thunder storms, and lots of construction. This month we would like to highlight those with HDH Associates that endure the hot temperatures while on the construction sites. HDH Associates has Quality Assurance Observers spread all over the Commonwealth of Virginia and one in the State of Wyoming. These people work hard keeping up with the contractors and their work schedules, keeping the office and Owners informed of the progress, and often practice the science of meteorology.....yep, they have to play weather man. We certainly cannot forget our environmental workers that often have to endure the hot temperatures inside containments during the hot months. ***Our hats go off to these field personnel and we thank you for your dedication, long hours, and hard work.*** HDH would also like to take this time to welcome Ryan Ritter to our QAO program. Ryan will be working with our more experienced inspectors as mentors to develop his knowledge and skills and provide our clients with the highest grade of professional services.

Project Spotlight

Halifax County Public Schools

Halifax County Public Schools should be a model for other schools systems when it comes to Roof Management. Under the supervision of Superintendent Paul D. Stapleton, Larry Roller, Director of Operations and Maintenance, and Dan Chmiel, Special Projects Manager, Halifax County Public Schools have embraced the Roof Management Plan developed by HDH Associates. In 2003, HDH Associates, P.C. completed a Roof Asset Management Report that provides the following information.

Roof Section Analysis • Planned Work • Emergency Roof Repairs • Planned Roof Repairs
Planned Roof Replacement • Financial Planning

Each year Halifax County Public Schools dedicates funding for roof maintenance and with HDH Associates, P.C. evaluate their roofing for repairs and or replacement. Maintaining watertight integrity to the roof systems reduces other cost associated with leaks such as replacement of ceiling tiles, floor covering, furnishing and electronic equipment.

Halifax County Public Schools has also utilized the services of HDH Technical, Inc. to provide the identification of, the design for removal of and monitoring during the removal of asbestos containing materials, as well as lead paint.

HDH APPENINGS

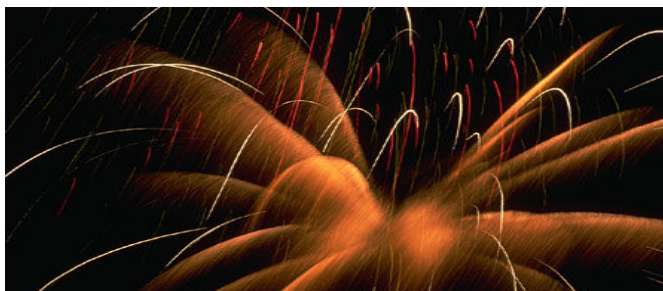

Employee Spotlight

Rainie Ward

Rainie has worked with Architectural Firms for 11 years, everything from office management, specifications, to project manager assistant. Working for HDH, put her right where she wanted to be – in the New River Valley. For years she wanted to be here and finally got the chance to work and live here. She was married in September and moved out to Claytor Lake. She loves the River and has fished it for many years. Smallmouth bass are her favorite, but the channel cats seem to be the fish she is catching that are earning her state citations (for now). On weekends you'll find her fishing the river and lake, kayaking the river on her fishing kayak, wading the creeks for trout, sitting on the deck enjoying cookouts. She also enjoys music and animals. Home fellowship, church, friends and family are the most important. She has 1 daughter, 2 sons and 3 granddaughters, whom she loves dearly.

Birthdays and Anniversaries

Tom Boyd (July 21)
Joe Hale (August 9)
Frank Jones (August 20)
Robin Liebal (September 8)
Charlie Hall—5 Years (September 22)
Ron Blose—2 Years (September 14)
Phil Clark—1 Year (August 3)

Happy Independence Day—July 4th
